

What people say about the Constellation?

This will be a more lasting method. Projects may come and go but I am confident that this process will last. *Father Joe Ngamkhuchung, India*

I always thought I needed more money and more experience to help my country. Now, I realize I don't need all this. I can help by supporting local responses and revealing people's strengths. *Dr. Zahidul Huque, UNFPA Indonesia*

The Constellation has an effective approach. For its low-cost but often labor intensive input of resources, the output has been substantial. *WHO-UNICEF evaluation in Papua New Guinea*

My two wives died of HIV. Members of my family stigmatized me. I felt totally lost and confused.

People from the Constellation came to see me in my small health centre in the middle of nowhere. They then highlighted all my achievements which I could no longer see and reminded me of my value, of my dignity. When you hear someone say that you have strengths, it makes you strong.

I realized that I wanted to achieve more. I managed to raise 1,000\$ to set up a small but functioning VCT centre; and we now provide ARV amongst other activities. That visit was the start of the positive spiral I am now in.

Dr. Fidèle Benda, Executive Secretary of PLHIV network in DR-Congo

Facilitators of the Constellation discover and reveal strengths which communities themselves might not realize, by asking appreciative questions. We call SALT our mode of interaction with communities: **S**timulate, **A**ppreciate, **L**isten, **L**earn, and **T**ransfer.

We stimulate and connect local responses around the world, through a structured process designed to operate at scale.
